

Eltek's solutions provide power and backup power required for efficient and stable operation of essential infrastructure, such as Telecom, Power Utilities, Data Centers, Railway & Metro, Marine & Offshore and Rural Electrification.

The Eltek range of monitoring and control units has been specifically developed to provide indication and management for DC standby power systems used in telecommunications and industrial applications

Pluggable battery breakers and DIN mounted load breakers ensures easy configurability as well as "in field" replacement. The power system has two controller options, Smartpack2 or Smartpack S which both has all the functionality required in present and future applications.

The Flatpack2 380V/3000W HE rectifier has high efficiency, OR-ing protection on output and high output power. Distribute pure battery backup DC voltage with a minimum of loss. Remove the low reliability DC-AC step in the central backup ...

Eltek also serves the industrial sector with its robust power systems and backup solutions, ensuring continuous operation of critical equipment and processes. From industrial UPS systems to battery chargers, Eltek's products safeguard against power disruptions and minimize downtime in industrial settings.

Eltek Valere's Smartpack2-based product range utilizes Flatpack2 rectifiers and the Smartpack2 distributed control system as building blocks for implementing effective DC power systems, suitable for a wide range of applications and power ratings.

The Flatpack2 380V/3000W HE rectifier has high efficiency, OR-ing protection on output and high output power. Distribute pure battery backup DC voltage with a minimum of loss. Remove the low reliability DC-AC step in the central backup power system ...
