

While it is helpful to recommit your django project wrapper back to a distributed version control repository. \*  
It is also important to remember that production instances will store security information in the  
local\_settings.py \* Admin/Devs should always remember to exclude this file in the .gitignore file in the same  
folder as the .git:

???(?????:        ?????        ?)????????,????????        ?????,????????????  
????????,????????,? ...

???(?????:        ?????        ?)????????,????????        ?????,????????????  
????????,????????,????????
