

projects that support the use of renewable energy. DNV GL has actively participated in (renewable) energy projects in Africa. The project references will be described in the next pages. DNV GL has offices for the rapidly expanding African region in Algeria, Angola, Egypt, Ghana, Kenya, Morocco, Nigeria and South Africa.

Most agree that to support electrification and decarbonization goals, we need to rapidly expand energy storage capacity and services. However, this expansion is hampered by several major barriers which are delaying progress towards cleaner, more ...

The fifth edition of the DNV Battery Scorecard takes a deep dive into the performance and safety metrics of electric vehicle (EV) and energy storage system (ESS) battery cells. The independent testing and accreditation ...

Long duration energy storage technologies like flow batteries, compressed air or gravity-based solutions look set to enter the market at scale in the second half of the 2030s, ...

DNV's Jason Goodhand tells Energy-Storage.news Premium about the insights learned from testing dozens of cells for this year's Battery Scorecard report. Published in April, DNV's Battery Scorecard aims to give ...

DNV has certified the feasibility of ADNOC's West Aquifer CO2 storage site in the UAE, the first site it has certified in the Middle East. It covers the initial subsurface assessments of the Simsima and UAE saline reservoirs, and signifies that the site is equipped for safe and effective CO2 storage.

DNV's Jason Goodhand tells Energy-Storage.news Premium about the insights learned from testing dozens of cells for this year's Battery Scorecard report. Published in April, DNV's Battery Scorecard aims to give anyone in the industry interested in buying batteries for energy storage systems a heads-up of the things they need to think about.

Our energy storage experts work with manufacturers, utilities, project developers, communities and regulators to identify, evaluate, test and certify systems that will integrate seamlessly with today's grid, while planning for tomorrow.

First ever prototype system-level certificate for a grid-scale energy storage solution. Benefits In the near future, stakeholders involved in the approval and financing of storage systems worldwide will demand these certificates.

The fifth edition of the DNV Battery Scorecard takes a deep dive into the performance and safety metrics of
