

Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

Energy in Angola describes energy and electricity production, consumption and export from Angola. The energy policy of Angola reflects energy policy and the politics of Angola . Biomass accounts for 58% of the country's energy consumption; oil accounts for 35%, gas 4% and hydroelectric power 3%.

In 2013, Angola had a population of just over 21 million with an energy sector dominated by hydropower and oil (IEA, 2016). Electricity production in 2015 was 617 ktoe with 73.2 per cent of it generated from hydro and 24.7 per cent from fossil fuels (AFREC, 2015).

Database; IRENA Global Atlas; and World Bank Global Solar Atlas and Global Wind Atlas. Additional notes: Capacity per capita and public investments SDGs only apply to developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all
