

Are solar panels suitable

Why should you choose a solar panel system?

Sunlight is free, so once you've paid for the initial installation, your electricity costs will be reduced. Solar electricity is low carbon, renewable energy. A typical home solar panel system could save around one tonne of carbon per year, depending on where you live in the UK.

Are solar panels a good investment?

Buying solar panels is a long-term investment that should help cut your electricity bills and carbon footprint. But will they pay for themselves and earn you money? Solar panels are often marketed as a way to save money on electricity - and sometimes as a way to make money too.

Are residential solar panels worth it?

If you compare this to the average annual electricity consumption of a household, which is around 2,700kWh according to Ofgem, residential solar panels can cover 117% of your electricity demand in perfect conditions. Other factors that affect whether solar panels are worth it include the following: Performance all year round.

Should you buy a solar PV system for your home?

Well-chosen solar panels can provide a reliable source of renewable electricity for decades, helping to slash your electricity bills and cut your carbon footprint. But buying an inappropriate solar PV system for your home could leave you out of pocket.

Are solar panels worth it in the UK?

Solar panels are definitely worth it in the UK. The average three-bedroom household will save 70% on its electricity bills by going solar, and break even on the cost of its panels after just 15.66 years. It's a large upfront cost - but if you can afford it, solar panels make an excellent investment.

Why do people install solar panels?

Solar panels are often marketed as a way to save money on electricity - and sometimes as a way to make money too. This is because you can get paid for the electricity they produce that you don't use. Of course, many people install solar panels for other reasons.
