If you want to use top of the line products - see the premium solar system price table further down this page.

How much does a 5kw Solar System cost in Australia?

You can probably get a 5kW solar power system installed in most major Australian cities for under \$4,000 if you try hard. But cheap prices come at a risky cost. Unfortunately in most cases you DO get what you pay for so BEWARE of the cheap "too-good-to-be-true" prices that try to knock out the competition.

How much does an off-grid solar system cost in Australia?

According to our Energy Matters team, the average cost of an off-grid solar system for a two--to three-person home is around \$25,000--\$35,000. The greatest expense is the battery. There are a number of government rebates and incentives available to help reduce the cost of off-grid solar systems in Australia.

How much does a 12Kw Solar System cost?

The average cost of a 12kW solar system is \$12,831. Depending on the quality of the system, you can pay as low as \$12,104 and as much as \$13,779. The thing with solar panels is that you always get what you pay for. You can get a cheaper system, but you may have to compromise on quality and reliability.

How much does a solar system cost?

Depending on the quality of your solar panels and overall system, a 12kW solar system can cost from \$13,000 for a lower-end system to \$21,000 for a higher-end system. Location also plays an important role in solar system pricing as it can affect the solar panel's price and the availability of the rebate you receive.

How much electricity does a solar system use in Australia?

The average electricity consumption for most Australian households is 20kWh, which makes 5kW solar systems the most convenient and cost-effective choice. However, 10 to 15kW solar systems are becoming popular for larger families with a high daytime power consumption.
