

Automatic backup generator for home Lebanon

What makes Generac a reliable generator?

Innovative engine design and rigorous testing are at the heart of Generac's success in providing the most reliable generators possible. Generac's G-force engine is purpose-built, capable of handling the rigors of generator use, resulting in power that is more reliable and requires less maintenance than any competitive engine.

Can a generator be installed at an all-electric home?

This can be installed at an all-electric home as long as the generator is properly sized for the demands for the home and complies with all codes and regulations for that locality. It will however need a fuel source, either liquid propane or natural gas to run.

Why should I buy a portable generator?

Unit is exercised and the oil stays moisture free. All-in-all an excellent unit and it is great not having to get up in the middle of a winter night, or any other time, and go hook up a portable generator. Thank you for taking time out of your day to provide us with your valuable feedback.

Standby Generators. A Generac standby generator protects your home and gives you peace of mind. When the power fails, you'll be ready. With automatic operation and 24/7/365 support from our Wisconsin headquarters, a Generac backup generator gives you added protection in an increasingly uncertain world.

What are Standby Generators? A whole home generator is a system that can provide backup power in the event of a power outage via two primary fuel sources: natural gas or propane. Available in a wide array of sizes, generators can work to power your whole home or temporarily keep your refrigerator and lights on.

You'll have peace of mind with a Generac Standby Generator protecting your home. Equipped with an Automatic Transfer Switch, your Standby Generator detects power outages as they occur and switches your home over from the grid to your generator. This process happens in only a few seconds, you may not even notice the power outage occurring.

The Westinghouse WGen20000c is a nominally portable powerhouse with a wheeled frame that makes it easy to move in and out of storage. Its impressive maximum power output of 28,000 watts is enough to keep your lights on, the heat or air conditioning running, and every other power-hungry appliance and electronic device in your home until electrical service ...

Our Standby Generator installations always come with the matching Automatic Transfer Switch. Your transfer switch is the "brain" of the generator, it's wired directly into your home's panel box and can detect an outage when it occurs. Once that happens, the switch flips and starts your generator, making power outages a thing of the past.
