

Bahamas aka energy systems

What do you know about aka energy systems?

Please tell us about AKA Energy Systems. What do you do in the energy sector? A. AKA Energy Systems is a globally recognized systems integrator and sustainable engineering company specializing in designing, manufacturing, and supporting power and propulsion assets for various industries, including marine, offshore, and renewable energy.

Why should you choose aka Power Systems for marine applications?

AKA's high reliability and hybrid power systems improve performance, reliability, efficiency and reduce carbon footprint for Marine applications. Alternate sources of power and energy storage systems are used to efficiently provide unprecedented grid stability and emission reductions in various configurations.

What is aka Green Energy?

AKA's green energy solutions are designed to support multiple commercial and industrial energy management strategies- and create options for providing grid services to utility or wholesale markets.

The AKA hybrid system integrates electrical and mechanical devices onboard a vessel to provide optimal modes of operation for power and propulsion. The hybrid system's energy management system strives to eliminate the unnecessary idling of diesel engines by determining the most efficient configuration of the electrical and mechanical devices ...

The AKA team is hard working and committed to meeting the challenges of our innovations in hybrid propulsion and power generation systems. We are dedicated to the development and delivery of leading edge technologies and cost-effective applications to our clients. ... AKA Energy Systems. Aspin Kemp & Associates Inc.

Our electrical assembly area is configured for large integrated system assembly. The floor space has the capacity to manage several assemblies at one time including equipment such as E-houses, large integrated skids, generator houses, MV and LV switchgear, MCCs, and hybrid power systems.

AKA Energy Systems (Aspin Kemp & Associates Inc.) is an energy systems provider delivering innovative solutions to island and microgrid power systems. AKA designs, manufactures, and supports power and propulsion assets for marine, Offshore O& G, and land-based industries. AKA has shifted the paradigm for fuel efficiency and reliability in ...

Our industrial power systems are capable of producing and supplying high efficiency, low cost hybrid energy to power plants, substations, and a wide variety of other industrial applications. AKA provides industrial grade power solutions through a diverse product line of switchboards, high-voltage DC power systems, large-scale battery ...

Bahamas aka energy systems

The brake choppers and energy storage system work together to create ride through capability for the drilling DC bus. Flat Power Curve. AKA's hybrid drillfloor has the ability to respond to load demand changes safely and instantaneously. The system changes between charging and discharging states in milliseconds and can quickly charge and ...

AKA's uninterruptible power supply (UPS) system is able to limit the effect of these disturbances, so that output power remains stable and available for any equipment powered from the UPS system. Typical vessel UPS systems suffer ...

AKA's marine power systems are designed to lower fuel consumption, reduce airborne pollution and increase energy efficiency and reliability aboard marine vessels. We develop and supply a suite of innovative power and propulsion systems which have significant proven results in risk reduction for vessel operators and creating greener power ...

AKA Energy Systems (previously known as Aspin Kemp & Associates) is a systems integrator and sustainable engineering company providing innovative solutions to power systems for island grids and microgrids.

AKA's pre-magnetization system reduces the effects of high inrush currents when power is first applied to the transformer primary. These high inrush current conditions can cause major stress on the power generation systems, even leading to the danger of tripping a generator.

AKA Energy Systems (previously known as Aspin Kemp & Associates) is a systems integrator and sustainable engineering company providing innovative solutions to power systems for ...

A. AKA Energy Systems is a globally recognized systems integrator and sustainable engineering company specializing in designing, manufacturing, and supporting power and propulsion assets for various industries, including marine, offshore, and renewable energy.
