How does a comprehensive energy policy work in the Bahamas?

Our comprehensive energy policies work together to modernize our system and bring electricity prices down in The Bahamas. 70MW of solar power and 35MW of Battery Energy Storage Systems will be integrated into the existing grid.

How will a new energy system affect the Bahamas?

Comprehensive upgrades to our country's transmission and distribution infrastructure, and switching from heavy and diesel fuels to solar power and natural gas, will create new efficiencies and reduce the price of electricity in The Bahamas. But it won't happen overnight - it will take time to upgrade our grid and to integrate cleaner energy.

Why is LNG being brought to the Bahamas?

Partners include: LNG is being implemented for efficient generation in New Providence. To reduce the overall energy cost to the consumer, improve the efficiency of the generation assets, and reduce environmental impacts, LNG is being brought to The Bahamas as an alternative to HFO and ADO. Partners include: Cross Project Partnerships:

Will the Bahamas build utility-scale solar power?

For the first time, The Bahamas is on the path to building utility-scale solar power across our islands. Large photovoltaic (PV) solar arrays will capture the energy from the sun and send it to our country's electricity grid. What steps are required as The Bahamas moves forward with utility-scale solar power, and what are the costs?

How does solar power work in the Bahamas?

Large photovoltaic (PV) solar arrays will capture the energy from the sun and send it to our country's electricity grid. What steps are required as The Bahamas moves forward with utility-scale solar power, and what are the costs? Island-by-island planning. Every one of our inhabited islands is different, and requires a unique set of solutions.

What is the new energy era in the Bahamas?

It's a New Energy Era in The Bahamas. Our electricity sector requires comprehensive reform. Lowering prices, and ensuring fair prices, for Bahamian homes and businesses. Increasing the reliability of our electricity supply. Increasing hurricane resilience during this new climate era.

The government of The Bahamas signed a contract agreement with the Caribbean Centre for Renewable Energy and Energy Efficiency (CCREEE) that will reaffirm its BluePrint for Change goal of "a minimum reliance on renewable energy of 30 percent by 2030."

Welcome to the official website of Hon. JoBeth Coleby-Davis, Minister of Energy and Transport for the Bahamas. As a dedicated leader, Minister Coleby-Davis is committed to advancing ...

Our outdated energy infrastructure, with transformers and substations over 50 years old, relies on heavy and diesel fuels, lacking capacity for clean energy like solar and resilience against hurricanes.

The government of The Bahamas signed a contract agreement with the Caribbean Centre for Renewable Energy and Energy Efficiency (CCREEE) that will reaffirm its BluePrint for Change ...

In that respect, a 5-year Renewable Energy Plan for New Providence and the Family Islands has been developed. This plan shows a path for the next 5 years to achieve the 2030 National Energy Plan Goals and outlines estimated level of investment that is needed to achieve these goals.

Energy Minister JoBeth Coleby-Davis said the commissioning results from a public-private partnership between BPL and Bahamas Utilities Holdings Limited, guided by a power purchase agreement...

Our country is finally taking a major step forward with utility-scale solar energy, and the role of solar energy will expand in the years ahead, especially as utility-scale battery storage becomes more widely available and affordable.

Welcome to the official website of Hon. JoBeth Coleby-Davis, Minister of Energy and Transport for the Bahamas. As a dedicated leader, Minister Coleby-Davis is committed to advancing sustainable energy policies and modernizing transportation infrastructure across the Bahamas.

The Ministry of Energy & Transport Bahamas is dedicated to bringing about energy and transportation reform in The Bahamas, transforming outdated and dysfunctional energy generation, distribution, and transmission, while ensuring a safe, efficient, and sustainable transport network across the Islands.
