How will the Bahamas reform its energy sector?

The Government of the Bahamas has discussed plans to reform its energy sector through a partial-privatization of BEC and by introducing regulation-by-contract principles to meet the capacity for future growth, implementing more economically viable renewable energy sources, and modernizing the energy sector.

Who owns electricity in the Bahamas?

Majority-owned by Emera Inc. Based on average global generation costs for renewable technologies, electricity rates in the Bahamas offer an opportunity for renewable energy to diversify the fuel portfolio and reduce rate volatility.

How much does electricity cost in the Bahamas?

Located north of Cuba, with the Turks and Caicos Islands to the southeast, the Bahamas has an average electricity cost of \$0.32 per kilowatt-hour (kWh), in line with the Caribbean regional average of \$0.33/kWh.

What is the energy efficiency initiative in the Bahamas?

With energy-related costs estimated at 15% to 20% of annual operating budgets for small- and medium-sized hotels in the Bahamas, the Bahamian hotel industry launched a significant energy efficiency initiative in 2013 in partnership with the Government of the Bahamas to reduce energy-related costs.

How much power does the Bahamas have?

The Bahamas Electricity Corporation (BEC) controls 438 megawatts (MW) of generation capacity, while Grand Bahama Power Corporation (GBPC) controls the remaining 98 MW. Generation is currently fueled by all imported petroleum with a mix of diesel (56.5%) and heavy fuel oil (43.5%), totaling 1,930 gigawatt-hours (GWh) for the entire country.

Will the Bahamas have a solar water heating system?

In the next decade, the Bahamas aims to have solar water heating systems on 20% to 30% of all households, which has the potential of adding 200 GWh of heat for water per year. According to preliminary assessments, wind and solar resources offer the greatest potential for renewable energy development in the Bahamas.

Energy Snapshot Bahamas This profile provides a snapshot of the energy landscape of the Commonwealth of the Bahamas--a country consisting of more than 700 islands, cays, and islets-- of which only 28 are populated. Located north of Cuba, with the Turks and Caicos Islands to the southeast, the Bahamas has an average electricity cost of \$0.32 per

Minister of Energy and Transport JoBeth Coleby-Davis said the Davis administration is calling on all world-class firms with proven experience to participate in the Family Island New Energy Generation via Micro-Grids, Clean Fuel and Renewables request for proposal (RFP) bidding process, to provide Family Islanders with better and more affordable ...

Minister of Energy and Transport JoBeth Coleby-Davis said the Davis administration is calling on all world-class firms with proven experience to participate in the Family Island New Energy Generation via Micro-Grids, Clean ...

With a vision of a sustainable and resilient energy future, The Bahamas is initiating transformative renewable energy projects in New Providence. These projects will harness solar power with capacities reaching up to 20MW, leveraging the island's renewable resources to meet its growing energy needs.

The Bahamas' energy sector has long grappled with high costs, outdated infrastructure, and a dependence on imported fossil fuels, resulting in rising electricity rates and frequent service disruptions. These challenges have underscored the need for a transformative approach to secure a more reliable, affordable, and sustainable energy future.

The government of The Bahamas signed a contract agreement with the Caribbean Centre for Renewable Energy and Energy Efficiency (CCREEE) that will reaffirm its BluePrint for Change ...

This document presents The Bahamas' Energy Report Card (ERC) for 2021. The ERC provides an overview of the energy sector performance in The Bahamas. The ERC also includes energy efficiency, technical assistance, workforce, training and capacity building information, subject to the availability of data.

The Government yesterday pledged Bahamas Power & Light (BPL) and its customers will ultimately enjoy \$126m in annual savings through "desperately" needed energy reforms that "won't happen ...

Welcome to the official website of Hon. JoBeth Coleby-Davis, Minister of Energy and Transport for the Bahamas. As a dedicated leader, Minister Coleby-Davis is committed to advancing sustainable energy policies and modernizing transportation infrastructure across the Bahamas.

The MoET is focused on advancing sustainable energy policies, modernizing public transit, and ensuring reliable, accessible services across The Bahamas. Through these initiatives, the Ministry is building a resilient foundation that supports both economic growth and environmental stewardship for future generations.

The purpose of the two-day energy summit is to mobilize and engage energy project partners, update the Bahamian public on energy reform plans and progress, promote energy efficiency, and encourage a deeper understanding of the energy sector.
