

# Be careful when installing photovoltaic panels on the roof

Do you need an electrician to install solar panels on a roof?

Proper electrical connections are vital for efficient solar panel operation on a roof system. Engage a qualified electrician who specialises in solar installations to ensure compliance with electrical codes and safety standards. This is especially important for the weatherproof roof covering, such as a slate roof.

Can solar panels be installed on tiled roofs?

In conclusion, embracing solar energy through the installation of solar panels on tiled roofs not only helps reduce carbon emissions but also provides long-term cost savings. Start your journey towards a sustainable future by exploring the possibilities of fitting solar panels to your tiled roof today.

Can you make a whole roof out of solar panels?

It is possible to create a whole roof out of solar panels using an in-roof system. Making the whole roof out of solar panels can be a fantastic option as installing solar panels is an asset to the home because of the savings in electricity and feed-in tariff payments. Why not consider making it your total roof covering?

Is my roof suitable for solar panels?

If the sun sets in front of you, it's west-facing; if it sets to the left, it's north-facing; and if it sets on the opposite side of the property, it's east-facing. Here's how an installer will decide if your roof is suitable for solar panels, including assessing its direction, usable space, and loft.

Can I install solar panels on a slate roof?

Not all roofs, including tiled roofs, are suitable for solar panel installation. To determine if your slate roof is compatible, several factors must be considered. Firstly, assess its structural integrity as solar panels add weight to the roof. If needed, reinforce or repair any weak areas before proceeding with installation.

Can solar panels be installed on a combustible roof?

In general terms, solar panels should not be installed on combustible roofs unless some form of fire protection can be installed between the panels and the roof e.g. concrete panels or pebble ballast. 3. Location of solar panels
