

Bess labs performance test Greenland

The BESS Lab first opened in 1990 to provide unbiased engineering data to aid in the design, development and selection of efficient livestock ventilation fans. The lab tests ventilation fans sent to them by equipment manufacturers, or the manufacturers can rent the lab for a day, which Ford said is the most economical option.

The MagFans are extremely gentle on the power consumption, they are also 100% maintenance free. The direct drive technology ensure performance stay the same throughout the estimated 20 year life cycle of the MagFan.

The Bio environmental and Structural System (BESS) Laboratory is a research, product-testing and educational laboratory. The lab provides unbiased engineering data to aid in the selection and design of agricultural buildings and assists equipment manufacturers in developing better products.

This Bess Lab test clearly demonstrates the extreme importance of good aerodynamics. The carefully designed fan body and impellers (pat. pending) we use on MagFan bring distinct advantages over any other fan on the market - be they conventional on/off fans or fan using highly advanced frequency controlled Permanent Magnet motors. The motor

Select Performance Tests University of Illinois, Department of Agricultural and Biological Engineering 332 Agricultural Engineering Sciences Building 1304 W. Pennsylvania Avenue Urbana, Illinois 61801 Ph. 217-333-9406 Fax 217-244-0323 [bess-info@illinois ...](mailto:bess-info@illinois...)

-- A test procedure to evaluate the performance and health of field installations of grid-connected battery energy storage systems (BESS) is described. Performance and health metrics captured in the procedures are: round-trip efficiency, r standby losses, esponse time/accuracy, and r ...

Today, we share the information about the BESS lab in Agricultural and Biological Engineering at U of I. A unique laboratory, BESS conducts ventilation fan performance testing for companies, and posts results in an online database that anyone can ...
