

Leclanché SA, a Swiss-based energy storage company, will provide its battery energy storage system (BESS) and energy management software to a natural gas-fired power plant in Levice, Slovakia. The project marks the first time battery storage technology will be used to support secondary frequency regulation application of a gas turbine.

The pilot project for the construction of the ENGIE Group's Battery Energy Storage System (BESS) in Velka Ida was completed and started its operation earlier this year. BESS with capacity of 1.25 MW will provide support service for Transmission System Operator (FCR: +/- Frequency Containment Reserve GRID) and ENGIE Balance Group.

In a landmark achievement, Wattstor and ENERGE have successfully implemented a cutting-edge 1.5 MW / 1.6 MWh Battery Energy Storage System (BESS) for ancillary services in Slovakia, enhancing the country's grid stability and fostering innovation.

Energodata, an ancillary grid services provider in Slovakia has partnered with leading battery energy solution provider, Leclanché SA, for the novel use of a battery energy storage system (BESS) to support secondary frequency control in a natural gas-fired power plant.

ENGIE's first battery storage system in Slovakia, utilizing Pixii's PowerShaper technology, began operations in January 2024. This BESS is integral to ENGIE's multi-phase project, enhancing grid stability, supporting renewable energy integration, and laying the groundwork for future energy flexibility services in Slovakia.

YVERDON-LES-BAINS, Switzerland, 10 th February 2021 - ENERGODATA, a major provider of ancillary grid services in Slovakia, has selected Leclanché SA (SIX: LECN), one of the world's leading energy storage companies, to provide its proprietary energy management software (EMS) along with a battery energy storage system (BESS) for a novel ...

Wattstor and ENERGE are proud to announce their collaborative deployment of battery storage for ancillary services in Slovakia. Slovakia's grid just got a boost of stability and innovation thanks to Wattstor's pioneering 1.5 MW / 1.6 MWh ...
