

BIM Energy is an easy-to-use energy analysis software that provides you with fast answers to complex questions regarding energy efficiency for both new and existing buildings. Whether you're a seasoned professional or just a beginner, we empower you to reduce your carbon footprint, make more informed decisions, and save time effortlessly.

Energy Blinds are blinds that contain solar panels in each of their slats. They are perfect for complying with the HE-5 technical code. Replacing conventional roof panels with photovoltaic blinds helps you save on construction costs, as it allows you to reduce construction steps and they are cheaper than roof panels.

Bouygues Energies & Services has responded to the growing demand for energy in the French West Indies with the construction of an extension to the EDF power plant on the Caribbean island of Saint Martin. Since 2016, this new plant has ensured the supply of an additional 25 MW of power to the French overseas territory.
