

Ireland can continue to be a world leader in renewable integration by putting in place investment signals for longer duration energy storage as we increase our wind and solar energy and strive towards our ...

Bobby Smith agrees that LDES is integral to the development of Irish energy storage, saying: "Ireland has really ambitious targets to drive down emissions and reach net zero by 2035; we are not going to do that without, in particular, long-duration storage and flexibility that can shift large volumes of energy around."

Since 2019, Bobby has worked with ESI members and policy makers to promote the development of energy storage on the island. In previous roles, Bobby worked as Grid Manager in Wind Energy Ireland and as an analyst in the Commission for Regulation of Utilities where he was involved in areas such as electricity networks policy, security of supply ...

One person who can provide insights into this is Bobby Smith, Head of Energy Storage Ireland and Ronan recently spoke to him. Last September, a KPMG report commissioned by ESI and Greentech Skillnet outlined that the energy storage sector has a key role to play in helping Ireland reduce carbon emissions and provide cleaner, cheaper energy to ...

Bobby Smith agrees that LDES is integral to the development of Irish energy storage, saying: "Ireland has really ambitious targets to drive down emissions and reach net zero by 2035; we are not going to do that without, in ...

Bobby Smith is Head of Energy Storage Ireland (ESI), a representative body for the energy storage industry in Ireland and Northern Ireland. Bobby works with ESI members and policy makers to promote the development of energy storage on the island and remove barriers to the integration of new flexible technologies.

Bobby Smith is Head of Energy Storage Ireland, a representative body for the energy storage industry in Ireland and Northern Ireland. Since 2019, Bobby has worked with ESI members and policy makers to promote the development of energy storage on the island.

Ireland can continue to be a world leader in renewable integration by putting in place investment signals for longer duration energy storage as we increase our wind and solar energy and strive towards our carbon reduction targets.
