Who is Hanley Energy?

Whether we're developing and delivering new products, deciding on the best solution for a customer's problem, or interviewing candidates - our leadership team and employees live by them every day. Hanley Energy is a globally recognised, award-winning data center solution innovator, headquartered in Ireland with many global operations.

Can Botswana meet its energy needs in 2021?

According to the International Renewable Energy Agency (IRENA), Botswana could meet 15% of its energy needs in 2030 from its indigenous solar, wind, and bioenergy resources. (2021 evaluation)

How many offices does Hanley Energy have?

The demand for Hanley Energy's services has led to global growth, and the company now has 12 offices worldwide, including two HQs (Stamullen, Ireland and Virginia, USA), whilst serving customers and partners in 26 different markets.

What makes Hanley Energy unique?

Part of the secret is that Hanley Energy had the foresight to look beyond product alone. Their successful proposal also took care of creating training modules and providing operational support to assist in rolling out the solution globally. In short, Hanley Energy didn't just focus on what the customer needed now, but what they would need next.

Is data centre complacency a problem at Hanley Energy?

The outlook for the next few years remains healthy -- the data centre industry in Ireland is expected to register a CAGR of 14% to 2030 -- but complacency has never had a place at Hanley Energy. Supply chain issues, for example, are a challenge that needs to be addressed.

Does Botswana utilize solar energy?

Botswana has one of the highest levels of solar insolation in the world, but until recently, there were no reports of significant use of solar energy. However, as of September 2012, the first solar power generation plant in the country has been opened. The Botswana Renewable Energy Conference was held on 11-12 August 2014.
