

What are the different types of energy sources in Zambia?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Zambia: How much of the country's energy comes from nuclear power?

Is biomass a source of electricity in Zambia?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Zambia: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

Does Zambia have oil?

Although Zambia has no proven commercial deposits of oil, the country hosts an oil refinery, the Indeni Petroleum Refinery, a 24,000 barrels -a-day facility, based in Ndola, in the Copperbelt Province. Zambia has a diversity of potential sources of renewable energy, such as its abundant water resources for hydropower generation.

What is the electricity demand in Zambia?

It is estimated that electricity demand in the country is growing at about 3 percent annually. There are three power producing and distribution companies in Zambia; (a) Zambia Electricity Supply Corporation Limited (ZESCO), a government-owned company (b) Lunsemfwa Hydro Power Limited and (c) Ndola Energy.

Is Zambia a strong source of growth?

The minerals sector is expected to continue being the country's strongest source of growth, particularly due to the reliance of green energy transitions on copper and cobalt, both of which can be found in substantial quantities in Zambia.

How many power companies are there in Zambia?

There are three power producing and distribution companies in Zambia; (a) Zambia Electricity Supply Corporation Limited (ZESCO), a government-owned company (b) Lunsemfwa Hydro Power Limited and (c) Ndola Energy. ZESCO, the largest of the three owns and maintains 94.7 percent (2306/2434) of installed hydropower capacity, as of 2016.

The BTI evaluates the quality of democracy, market economy, and political management in 137 developing and transition countries. For Africa, the findings highlight a spectrum of strengths and weaknesses: Zambia and Malawi exhibit robust democratic institutions with limited influence from anti-democratic actors, indicating a positive trajectory.

This report is part of the Bertelsmann Stiftung's Transformation Index (BTI) 2022. It covers the period from February 1, 2019 to January 31, 2021. The BTI assesses the transformation toward democracy and a market economy as well as the quality of governance in 137 countries. More on the BTI at <https://>

Zambia's economic recovery continues, but challenges persist. Although inflation dropped, it has not met government targets. Economic growth at 3.1% in 2022 also fell below the 4% goal. Facilitating business setup and diversifying economic activities remain a major challenge.

developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided
