Is solar energy a good source of energy in Cambodia?

Solar energy in Cambodia is the country's second most promising clean energy source behind hydropower. Hydropower remains Cambodia's most developed renewable energy source but also has its own challenges - such as yearly variability due to droughts and floods.

What are Cambodia's goals for solar energy?

With these opportunities in mind, the government has set ambitious targets for expanding solar energy in Cambodia, aiming to inject 2 GW of solar energy into the grid by 2030. This goal is supported by a range of policies designed to facilitate the growth of the solar sector, including incentives for investment and development.

Is Cambodia a solar power hotspot?

Cambodia's geographical location and climate conditions position it as a solar power hotspot with potential that surpasses many of its regional neighbours. Studies show that the country receives a daily solar irradiance of 5 kWh per square m and an average of eight hours of sunlight daily.
