

# Can I install solar panels at home

Can I install my own solar panels?

Yes, you can install your own solar panels. Sunstore Solar can provide professional installation, but we appreciate some people like to get stuck into a project. We designed our solar panel kits specifically for DIY solar panel installation projects. And what better project than providing energy security for your family or business?

Should you start a DIY project with solar panels?

Beginning a DIY project with solar panels like EcoFlow Solar Panels marks a significant step towards securing renewable energy for your home. To install your own solar panel system, you must first understand such a project's legal and practical aspects.

Can a DIY solar panel installation save you money?

Embarking on a DIY solar panel installation can be rewarding, offering significant cost savings and a better understanding of your home's energy systems. We'll help guide you to simplify the process, from initial planning and preparation to the final steps of connecting your system to the grid.

Where can I install solar panels?

You can install them on your home, business premises, outbuilding, garden office, shed, workshop or garage- and even shepherd's huts for those who run a luxury holiday let facility. As long as the roof is strong enough and large enough to fit the units, you can install solar panels on whatever type of property you want to supply energy to.

What is a DIY solar panel installation?

DIY installations allow you to customise your solar panel system to match your home's energy needs and roof layout (or perhaps even a balcony). Some professional installations may offer limited options, while a DIY approach allows for optimising panel placement, choosing specific components, and tailoring the system for maximum efficiency.

Can you install solar panels on a roof?

Most DIY home solar panel installations in the UK are roof mounted. As long as you're happy up a ladder, the process isn't as difficult as you might imagine. We recommend planning in advance where you'll put the panels to determine where you need to install the frames and brackets. It's a lot easier when you have a plan!
