

China lti reenergy

Who is LTI ReEnergy cleantech?

LTI ReEnergy CleanTech GmbH is a leading German automation company group founded 50 years ago and has started to be active in the renewable sector in wind energy since 1999 and solar energy since 2007.

Where is LTI based?

Beyond its robust German technology and European and Middle East engineering base, LTI has successfully set up a technical project development arm acting out of the UAE and a project funding and financial structuring business arm incorporated in London.

What does LTI do?

Under LTI's supervision, they work to complete projects at foreseen budgets, timelines, and energy generation levels to de-risk the financial investments during the construction phase.

Why should you choose LTI power electronics?

LTI's high-efficiency power electronics is renowned for being deployed in extra-harsh conditions, particularly for the Solar and Waste-to-Energy industry.

How does LTI ensure project viability?

LTI also assures the project viability by structuring the debt and equity investments after the grid connection and commercial operation commencement date and the bridge funding for the construction period and some of the world's largest EPC companies.

Sujan LTI ReEnergy Private Limited, India & Taiwan. Our Floating Solar Manufacturing Business .

Moog Inc. (NYSE: MOG.A and MOG.B) announced that it has acquired the remaining 60% ownership of the wind energy business of LTI REEnergy GmbH in Unna, Germany and Shanghai, China. The consideration was EUR12 million in cash paid and the issuance of a EUR9.5 million note payable in February 2010.

After taking a 40 percent ownership stake in privately held LTI REEnergy GmbH last June, Moog Inc. has acquired the remaining 60 percent of the company. As a result of the transaction, Moog is acquiring two manufacturing and testing facilities, one in Unna, Germany, and the other in Shanghai, China.
