

# Civilization Restart Lockers can be broken

How do you get past 'lock up' in Civ 6?

The ONLY ways I've gotten past the game LOCK up is to completely reboot my PC or start a completely new game. Long time Civ 6 players will remember this being an issue when the game first launched and didn't get fixed until Rise & Fall was released. I'm just so completely tired of this broken and uninspiring version of Civ.

How do I reinstall Sid Meier's Civilization 5?

If troubleshooting does not work, you can remove all of the game files and attempt to reinstall. These steps are for Windows. The file locations are different on Mac. Go to Documents\My Games\Sid Meier's Civilization 5\ and make a backup for the saves folder if you want to keep your saved games. Close Steam and restart your computer.

How do I fix a crashing error in Civilization V?

PCGamingWiki's Civilization V page [pcgamingwiki.com] - A wiki listing all common issues and fixes. These steps can resolve many problems with crashing and errors. Close and restart Steam. Make sure that Steam is online the first time you run the game. Verify the game cache. Reboot your computer. Update your graphics driver.

How do I reinstall Civilization V?

Reinstall Civilization V with Steam. This will ensure you have a fresh install of the latest version of the game. If you are currently in the launcher or playing the game, close them. Right click on the desktop. Choose "Display settings". Look for "Scale and layout". Make note of what is selected so that you can change back to it later.

Why is Civilization V not working?

Many issues with Civilization V are caused by out of date drivers. As of December 2018, an updated launcher is used. Some of these workarounds may no longer work. This is usually caused by antivirus software stopping the Steam client from downloading the game. Temporarily disable your antivirus and try downloading the game again.

How do I fix Sid Meier's Civilization 5 error message?

Go to Documents\My Games\Sid Meier's Civilization 5\Edit config.ini Change the line EnableGameCoreThreading = 1 to EnableGameCoreThreading = 0. Save the file. This error message is caused by old files being left in the game. To fix this:

There is actually a much easier way, at least if you use Steam. When you first get the splash screen, where you can click play, rather than clicking play, choose options and game settings.
