

How can Croatia benefit from solar energy?

However, to harness this potential effectively, Croatia will need to adopt more ambitious solar energy targets, ensure clear renewable energy investment direction in the power sector, and develop its modern electricity grid. The clean energy transition and development of the solar power sector can contribute to GDP growth and new jobs creation.

Is solar irradiation a viable energy source in Croatia?

The abundance of solar irradiation in Croatia shall enable photovoltaic energy to become an increasingly cost-competitive power generation source and attract new investments. Croatian solar resource potential Energy Institute Hrvoje Pozar initiated several solar radiation measurements projects in Croatia.

How much solar power does Croatia have?

By the end of 2014, the country had approximately 33 MW solar capacity. However, solar photovoltaic market growth in Croatia between 2015 and 2019 was moderate, with only 20.4 MW newly installed capacity in this period from eligible producers. Chart 2: Croatia Solar Photovoltaic (PV) Electricity Generation 2011 - 2019 in TWh; Renewable Market Watch(TM)

Does Russia still supply natural gas in Croatia?

For now, Russia still has the major role in the natural gas supplying in Croatia, but as it was stated above, the recently inaugurated LNG import terminal on the island of Krk is probably going to be a serious challenge to the Russian gas transmission policy in the whole area.

Who is the Prime Minister of Croatia?

The Croatian Democratic Union (HDZ), is the major conservative centre-right political party in Croatia. The HDZ's leader, Andrej Plenkovic, is the current Prime Minister of Croatia, having taken office following the 2016 and 2020 parliamentary elections. Historical solar photovoltaic market development of Croatia

According to the lobby group's internal data, Croatia is on track to reaching 418 MW of installed capacity by the end of the month, with 2 GW of solar projects in the pipeline, she said.

Donja Dubrava SPP is another flagship renewable project, driving forward the green transition of Croatia's power system, and further reducing the industry's carbon footprint. We completed the construction and commissioned the largest and the most advanced Croatian solar power plant in ...

As high electricity bills have closed most hotels along Croatia's Adriatic coast ahead of the winter season, the mayor of the Dalmatian port town of Makarska is making plans to make it energy ...

Croatia offers many opportunities for developments in the renewable energy sector, particularly solar energy.

The country has one of the highest insulations in the EU, between 2000 and 2700 hours of sunshine a year. With these potentials, Croatia could become one of the most significant producers of solar energy in the EU.

The solar power plant. In 2018, Krizevci inaugurated a fully crowdfunded solar power plant. Located on the roof of the city's business centre, it has a capacity of 50 kilowatts and is expected to save around 55 tonnes of carbon dioxide per year.

Recent solar photovoltaic (PV) market activity and renewable energy capacity tenders in Croatia. The Croatian government approved in May 2020 a new tender framework for power plants based on renewable energy ...

Spanish renewables developer ACCIONA Energ&#237;a has been awarded a 12-year contract for difference (CfD) for its Promina solar power project in Croatia. The 189 megawatts peak (MWp) photovoltaic plant, currently under development, will be the largest solar facility in the country upon its completion in 2027.

Recent solar photovoltaic (PV) market activity and renewable energy capacity tenders in Croatia. The Croatian government approved in May 2020 a new tender framework for power plants based on renewable energy and co-generation. This framework assumes the country allocates approximately 1,100MW (1.1GW) of solar power capacity.

The solar power plant. In 2018, Krizevci inaugurated a fully crowdfunded solar power plant. Located on the roof of the city's business centre, it has a capacity of 50 kilowatts and is expected to save around 55 tonnes of ...
