

Modularni UPS sustavi iz naše ponude mogu se koristiti kao samostalni UPS uređaj ili kao paralelni sustav s više ormara snage do 7,5 MW. Fleksibilnost u broju baterijskih blokova uređaja (od 20 do 50) omogućava dizajnerima sustava optimizaciju troškova u odnosu na vrijeme autonomije.

With N+X redundancy a system has several UPS units or modules operating in parallel. Up to X number of UPS units or modules can fail, the system will continue to run smoothly. Conventional UPSs rely on a 1+1 redundancy structure. While 1+1 improves reliability, its offline maintenance and system expansion capabilities lack flexibility.

Delta's innovative modular UPS technologies provide the answer to customers' demand for ultimate availability, excellent performance, and high efficiency. The brand-new Delta Modulon DPH series UPS 80/120 kVA achieves the industry's leading power density of 20kW per module in 2U height, offering the smallest footprint and best space utilization.

With a next-generation modular UPS design, organizations can achieve greater flexibility in meeting evolving power demands and ensure uninterrupted availability of critical applications. By adopting a modular approach, businesses can scale their power infrastructure efficiently, reduce downtime during maintenance activities, and enhance overall ...

Liebert APM UPS, 30-600 kW. The Liebert APM is a versatile and modular, transformer-free UPS designed to operate with a maximum energy efficiency of up to 96.3% for the protection of medium to large-sized business-critical applications.

Liebert APM UPS. The row-based Liebert APM is a transformerless, on-line UPS that allows quick and easy capacity increases with modular power scalability - no additional floor space required. The UPS operates with high efficiency - up to 94% at loads of 50-100%.

Incorporate the Smart-UPS Modular Ultra into a rack or add a standalone tower for a more flexible installation. Smart-UPS(TM) Modular Ultra: 2.5x the power in half the size. An unmatched UPS in power and size Up to 2.5x more power density in a 50% smaller and 60% lighter footprint than any comparable modular UPS

Modular UPS units are fast replacing standard UPS units as the most cost effective and energy efficient power sources on the market today. Delta's Modulon family UPS Series features three-phase modular UPSs for power rating requirements above 15 kVA that serve as power protection for mission-critical infrastructure such as datacenters, mid to ...

The Modulon DPH Series UPS is a modular UPS used extensively for critical operations, since it provides 25% more power output compared to power factor 0.8 UPS systems. Designed for the most stringent datacenter requirements, the Modulon DPH Series offers the highest possible availability. With its modular structure, the true on-line, double ...

In a traditional UPS, failure of a single module can bring down the entire system. However, in a modular design, power modules function independently, reducing the impact of failures. The distributed architecture of a modular UPS increases system resiliency and fault tolerance, minimizing the risk of total system shutdown.

Modular After years of debate, and extensive comparison of monolithic and modular UPS designs, consumers are reaching a consensus: the best 3-phase UPS is a modular 3-phase UPS. As the pain points of the ...

Izuzetno ucinkovit, skalabilni trofazni UPS od 200 do 500 kVA/kW, koji sadrzi modularni, redundantni dizajn i niski TCO za srednje i velike podatkovne centre i rizicna okruzenja. Dostupnost. Smanjeni operativni troskovi. Prvoklasna zastita napajanja za ...
