

Denmark harka energy dmcc

Should Denmark prepare a green infrastructure master plan?

The IEA report also recommends preparing a green infrastructure master plan at the regional level, as Denmark assumes the Presidency of the North Sea Energy Cooperation in 2024. Such a plan would help to lower cost and de-risk investment. This includes power grids, CO₂ and hydrogen networks.

How much of Denmark's gas consumption comes from biomethane?

In the same year, almost 40% of Denmark's gas consumption came from biomethane. While great strides have been made in the energy sector, achieving Denmark's goal of a 70% reduction in greenhouse gas (GHG) emissions by 2030 will require even greater efforts.

How long will Denmark be able to reduce emissions?

By the end of the decade, Denmark must achieve in seven years what it managed over the past 30 years in terms of emissions reductions. According to the new IEA energy policy review, additional measures will be needed most notably in the transport and buildings sectors.

At Harka Energy, we offer a comprehensive range of services, specializing in Trading of Petroleum and Petrochemical products, Chemical fertilizers, and offering its allied services.
