

# Easy tutorial on how to make your own solar power

How do you build a solar panel?

To build your own solar panel, you'll need to assemble the pieces, connect the cells, build a panel box, wire the panels, seal the box, and then finally mount your completed solar panel. Purchase the cells. There are a few different types of solar cells to buy, and most good options are either made in the United States, China, or Japan.

How to build a DIY solar system?

**Plan the Wiring:** Plan the wiring of your solar system, including the placement of your solar panels, the connection of your solar panels to the inverter, and the connection of the inverter to your battery system. Now that you have planned and designed your DIY solar system, it's time to install it.
