

Does Egypt have solar power?

Egypt's government has also tried to boost rooftop solar power by offering homeowners generous incentives. Yet even though Egypt will host this year's international summit on climate change, its dirtier sources of energy continue to overshadow the solar sort. Listen to this story. Enjoy more audio and podcasts on iOS or Android.

Is Egypt a good place for solar power?

The International Energy Agency (IEA) reckons Egypt is one of the world's best regions for solar. Some companies agree, having invested in projects such as the Benban solar park, one of the world's largest, 650km (400 miles) south of Cairo. Egypt's government has also tried to boost rooftop solar power by offering homeowners generous incentives.

Should Egypt install its own solar power?

Egypt's government has found it hard to convince its citizens of the merits of installing their own solar power. In 2014 it introduced a "feed-in" tariff, promising to pay homeowners and companies for surplus solar power they produce. Yet eight years later only a paltry 749 rooftop solar units have been installed.

Why did Egypt have a power outage last summer?

Last summer, Egypt faced daily power outages lasting up to three hours caused by the high demand for cooling during heatwaves. AMEA Power Chairman Hussain Al Nowais noted that the plant will expedite the implementation of the green energy strategy in Egypt and help address the energy shortages experienced last year.

Will AMEA power plant help address energy shortages in Egypt?

AMEA Power Chairman Hussain Al Nowais noted that the plant will expedite the implementation of the green energy strategy in Egypt and help address the energy shortages experienced last year. The first electricity from the plant was delivered to the national power grid last week.

What percentage of Egypt's Electricity is renewable?

Enjoy more audio and podcasts on iOS or Android. In 2016 Egypt set a target of producing 20% of its electricity from renewable sources by 2020, with most of the new capacity coming from sun and wind. But in the 12 months to March 2021 renewables including hydro accounted for just 12%, with solar power contributing under 3% of Egypt's electricity.
