

Battery storage is a critical enabler of the clean energy transition, helping to cost-effectively integrate renewable energy at scale while providing vital flexibility to increase the resilience and reliability of electricity systems globally.

The Australian Capital Territory (ACT) government and Eku Energy have officially commenced construction of the Williamsdale Battery Energy Storage System (BESS). The 250MW/500 megawatt hours (MWh) Williamsdale BESS, part of the ACT Government's Big Canberra Battery project, will store sufficient renewable energy to power one-third of Canberra ...

Macquarie-backed Eku Energy has completed the financing on its first battery energy storage system (BESS) project in Japan. The pureplay energy storage developer, jointly owned by Australia's Macquarie Asset Management (MAM) fund and Canada's British Columbia Investment Management Corporation (BCI) made the announcement last week (2 July ...

Eku Energy has announced the financial close for its Williamsdale Battery Energy Storage System (BESS) project in Canberra, in the Australian Capital Territory (ACT). The 250MW/500 megawatt hours system, which will be powered by Tesla Energy's megapacks, is a key component of the ACT government's Big Canberra Battery initiative.

The renewable energy scheme will involve the installation of solar panels, battery storage capacity and grid management options in Majuro, the islands' capital city. According to the statement, the World Bank will also deliver technical assistance to the country in order to identify further options for renewables development in Ebeye and the ...

Eku Energy is a global battery storage business on a mission. We're working across the full project life cycle to develop, build, and manage energy storage assets with the aim of advancing the energy transition and facilitating the delivery of safe, secure, reliable clean energy worldwide.

Global battery storage company Eku Energy intends to expand its global energy storage capacity to 9 gigawatt hours (GWh) by 2028. This ambitious target marks a substantial increase from the current 1.3GWh, underscoring the company's commitment to accelerating the energy transition and enhancing the use of renewable sources.

Energy storage developer Eku Energy has started constructing a 250MW/500MWh battery energy storage system (BESS) in Canberra, the Australian Capital Territory (ACT). A groundbreaking ceremony was held today (22 November), with the recently re-elected ACT chief minister Andrew Barr in attendance.
