

What is EnCap - India's pioneering energy storage solution?

In a groundbreaking leap in the world of energy storage, iNVERGY proudly presents ENCAP - India's pioneering energy storage solution that harnesses the power of graphene. Breaking free from conventional lithium-ion batteries, ENCAP is set to redefine the future of energy storage with its cutting-edge features and unmatched performance.

What is EnCap energy storage?

Breaking free from conventional lithium-ion batteries, ENCAP is set to redefine the future of energy storage with its cutting-edge features and unmatched performance. Key Features: Graphene Powerhouse: ENCAP utilizes advanced graphene technology to store energy, offering unparalleled efficiency and reliability.

What is EnCap by invery?

Join the energy revolution with ENCAP by iNVERGY - where graphene innovation meets sustainability for a brighter and more efficient future. ENCAP by iNVERGY: Cutting-edge graphene battery with 25-year life, 500,000 cycles, OLED display, zero maintenance, and eco-friendly design.

What applications can EnCap be used for?

Versatile Applications: ENCAP is tailored for various applications, including: Join the energy revolution with ENCAP by iNVERGY - where graphene innovation meets sustainability for a brighter and more efficient future.

What makes EnCap unique?

Key Features: Graphene Powerhouse: ENCAP utilizes advanced graphene technology to store energy, offering unparalleled efficiency and reliability. Extended Life: Enjoy peace of mind with a remarkable 25 years of calendar life and an astounding 500,000 cycle life.

What are the benefits of EnCap?

Rapid Charge and Discharge: Experience seamless energy transfer with a 1C charge and 1.5C discharge rate. Zero Maintenance: Say goodbye to the hassle of maintenance with ENCAP's hassle-free operation. Versatile Applications: ENCAP is tailored for various applications, including:

Croatia will provide some EUR500 million (US\$534 million) in subsidies for battery energy storage system (BESS) technology, a government minister has said. Minister of Economy and Sustainable Development Damir ...

The Government of Croatia is preparing EUR 500 million for the installation of batteries for storing renewable energy. Minister of Economy and Sustainable Development Damir Habijan said Croatia is ready for changes in ...

In September 2020, Energy-Storage.news reported on a EUR20 million grant from the EU to Croatia-based energy storage operator IE-Energy for the firm to deploy projects in the country. In April, Croatia and its neighbour ...

The Government of Croatia is preparing EUR 500 million for the installation of batteries for storing renewable energy. Minister of Economy and Sustainable Development Damir Habijan said Croatia is ready for changes in the energy sector.

Encap storage is used for energy storage applications, like batteries, i.e. where large amount of energy are delivered over long periods of time. Applications such as Telecom Towers, Residential Backup, Grid Storage, EV Charging Stations, Microgrids etc.

Central and Eastern Europe (CEE)-based developer and independent power producer (IPP) Woodburn Capital is deploying a co-located battery storage project in Croatia, with final regulations around connecting ...

Central and Eastern Europe (CEE)-based developer and independent power producer (IPP) Woodburn Capital is deploying a co-located battery storage project in Croatia, with final regulations around connecting batteries to the grid expected imminently.

Croatia will provide some EUR500 million (US\$534 million) in subsidies for battery energy storage system (BESS) technology, a government minister has said. Minister of Economy and Sustainable Development Damir Habijan revealed the funding, part of a larger EUR1.6 billion for energy projects, at the JANAF conference in Zagreb earlier this month ...

The measure will contribute to the modernisation of Croatia's energy network, increase the country's and the EU's energy security and accelerate the decarbonisation of the Croatian energy sector.

In September 2020, Energy-Storage.news reported on a EUR20 million grant from the EU to Croatia-based energy storage operator IE-Energy for the firm to deploy projects in the country. In April, Croatia and its neighbour Slovenia started a trial project looking at how a five-hour duration battery storage system could increase grid flexibility in ...

The battery storage system provides energy balancing and maintains grid stability on the island of Vis. The system operates on Li-ion batteries which enable rapid response, both in the terms of energy delivery requirements and for the purpose of storing electricity generated from either Vis SPP or the power grid.
