

Electricity is increasingly being generated from renewable sources - solar, wind, geothermal, bioenergy and hydropower - but their output is intermittent. By utilizing advanced tech solutions, such as Battery Energy Storage Systems (BESS), we ...

The project establishes Sri Lanka's largest non-government-funded battery energy storage system (BESS), powered by solar photovoltaic (PV) technology. The battery commissioning event took place on 24 July at the Watch Tower Sri Lanka headquarters.

The government of Sri Lanka has entered into a power purchase agreement (PPA) with Australian firm United Solar Group (USG) for a major floating solar power (FPV) and storage project. The country's Minister of Power and Energy Kanchana Wijesekera announced the PPA on X, formerly known as Twitter, yesterday (12 December).

Sierra Energy Solutions stands at the forefront of revolutionizing the energy sector with its integrated smart solutions. The company specializes in state-of-the-art technologies, seamlessly incorporating solar PV, Battery Energy Storage Systems (BESS), Energy Management Systems (EMS), and both on-grid and off-grid connectivity

Energy storage can be deployed in bulk or distributed throughout a power grid. A good example of bulk energy storage is pumped-storage hydroelectricity. These power plants are in fact, reversible hydropower stations, and they can pump water into a reservoir when there is spare generation capacity in a power grid.

The project will support Sri Lanka's pursuit of a 70% renewable energy by 2030 policy target for electricity generation. The country currently sources power from a relatively high share of renewables due to hydroelectric generation facilities and some contributions from distributed solar PV and wind.

The proposed 4 energy storage solutions for Sri Lanka include: 1. Pumped Hydro Storage: An efficient and established method for large-scale energy storage. 2. Battery Technologies: Focusing on Lithium-ion Batteries and Flow Batteries, which offer high energy densities and flexible applications. 3.

Sri Lanka's state-owned Ceylon Electricity Board (CEB) has said it hopes to increase renewable energy sources to 70 percent of its energy generation mix by 2030, and reduce dependency on fossil fuels.
