

Why is battery energy storage system being introduced in Mauritius?

In view of the increasing share of the Variable Renewable Energy (VRE) in the energy mix of Mauritius, the CEB has planned for the introduction of Battery Energy Storage System on its network to arrest the fluctuation inherent to the VRE systems. The Mauritian energy transition to a low carbon economy is picking up speed.

What is Mauritius' long term energy strategy?

This is in line with the Government of Mauritius' Long Term Energy Strategy 2009-2025 to increase the share of renewable energy in our energy mix (electricity production, transportation sector and manufacturing) to 35% by, namely, reducing the country's dependence on coal and heavy oil for electricity generation.

How will Mauritius transition to a low carbon economy?

The Mauritian energy transition to a low carbon economy is picking up speed. The CEB has installed the first grid-scale Battery Energy Storage System (BESS), the first in its kind in Mauritius, to enable high capacity storage of renewable energy in the grid.

In his address, Minister Lesjongard underlined that the 20 MW BESS is in line with Government's policy to encourage the use of Renewable Energy and clean energy in view to reduce the country's dependence on fossil fuels and ...

The large-scale battery energy storage system (BESS), provided by German engineering company Siemens, was inaugurated on the morning of 28 May, with dignitaries in attendance including the country's minister of energy and public utilities Georges Pierre Lesjongard.

In his address, Minister Lesjongard underlined that the 20 MW BESS is in line with Government's policy to encourage the use of Renewable Energy and clean energy in view to reduce the country's dependence on fossil ...

The large-scale battery energy storage system (BESS), provided by German engineering company Siemens, was inaugurated on the morning of 28 May, with dignitaries in attendance including the country's minister of energy and ...

The BESS resources are aimed at enabling Mauritius to reach its energy policy goals, including a target of sourcing 60% of its electricity from renewables by 2030 and reducing greenhouse gas (GHG) emissions 40% and ending the burning of coal for electricity by that year.

The four StorSun solar plants located in Trou d'Eau Douce (SS1 and SS2), Balaclava (SS3) and Petite-Rivière (SS4) will integrate large scale Battery Energy Storage Systems (BESS) to provide a

clean and firm renewable power to the grid.

This high-tech, latest technology and ultra-fast response battery energy storage system (BESS) is the first of a series of upgrades to the electricity grid in order to achieve a smarter, more modern and cleaner electricity network in Mauritius.

The BESS resources are aimed at enabling Mauritius to reach its energy policy goals, including a target of sourcing 60% of its electricity from renewables by 2030 and reducing greenhouse gas (GHG) emissions 40% and ...

The large-scale battery energy storage system (BESS), provided by German engineering company Siemens, was inaugurated on the morning of 28 May, with dignitaries in attendance including the country's ...

The four StorSun solar plants located in Trou d'Eau Douce (SS1 and SS2), Balaclava (SS3) and Petite-Rivière (SS4) will integrate large scale Battery Energy Storage Systems (BESS) to provide a clean and firm ...

I wish to thank the Technical Committee chaired by the Mauritius Renewable Energy Agency comprising representatives of the Ministry of Energy and Public Utilities, the Central Electricity Board and the Energy Efficiency Management Office for the laudable piece of ...
