

Where does Grenada get its energy from?

Grenada derives almost all of its energy from imported hydrocarbons. In 2020, non-renewables accounted for roughly 98% of installed capacity and electricity generation, with solar energy making up the difference.

Who is responsible for energy projects in Grenada?

The MOID (Ministry of Infrastructure Development, Public Utilities, Energy, Transport, and Implementation) is responsible for energy programs in Grenada. MOID handles the majority of permitting related to energy projects.

Does Grenada have a wind farm?

Grenada has had success with implementing energy efficiency and renewable energy projects. To date, GRENLEC has assessed five sites on the main island and two on Carriacou for wind farm feasibility. A wind-diesel hybrid has been discussed for Petite Martinique, but its development is on hold.

How much electricity does Grenada use?

In 2020, Grenada produced 223 GWh of electricity, relying mainly on fossil fuels (98.12%), with a small contribution from solar energy (1.88%). In 2018, peak demand was 33.2 MW. In 2016, Grenada consumed 185.1 million kWh of electricity. As of 2018, 95.3% of the population had access to electricity.

Does Grenada have a climate problem?

The government of Grenada has expressed concerns about climate change, but continues to rely on diesel and refined petroleum products, despite having ample sunshine and active volcanoes that could be utilized for renewable energy. The government aims for at least 30% of electricity to be generated from renewable sources by 2030.

How do I get a generator permit in Grenada?

Electricity self-generators must apply for a permit through the PURC (Public Utilities Regulatory Commission), Grenada's regulatory authority for energy. GRENLEC (Grenada Electricity Services) is the formerly privatized, now nationalized, electrical company of Grenada. Grenada does not have a national oil company.

The 2021 Energy Report Card for Grenada provides an overview of energy sector performance and includes energy efficiency, projects, technical assistance, workforce, training and capacity building information, subject to the availability of data.

Grenlec aims to increase renewable energy use. The objectives are to stabilise energy costs; reduce dependence on imported fuel, support economic growth; and protect the environment by increasing the use of renewable energy. ...
