

Largest solar park in Estonia: Estonian energy company Evecon has completed a 77.53 MW solar power plant in the country calling it the largest solar park in the Baltics has more than twice the capacity of the largest existing solar park in Estonia. Built by an Evecon and Mirova joint venture (JV), the Baltic Renewable Energy Platform (BREP), the ...

JA Solar's Senior Technical Sales Engineer Francesco Liuzza shared the company's efforts to introduce products for innovative PV applications using n-type TOPCon technology. Its flagship product, the DeepBlue 4.0 Pro, has a module efficiency reaching up to 26.5% and incorporates new technologies like the zero busbar (0BB), and low-stress wafers.

In this context, TaiyangNews is hosting its annual flagship event - High-Efficiency Solar Technologies 2024. This 4-day event (2 x 2 days) will host the key stakeholders from different parts of the value chain - including PV manufacturers, material suppliers, equipment makers and researchers - to provide a 360° view of developments for ...

Sunly has raised EUR65.9 million project financing from mBank for its Polish solar portfolio It will enable the company to construct 58 solar PV farms with a c. Markets; Business; ... the Estonia-headquartered renewable energy developer, has raised senior non-recourse project financing from the Polish banking group mBank to develop 98 MW of ...

Hoyuan Green Energy reports H1 2023 results: Solar PV equipment and mono-wafer manufacturing company Hoyuan Green Energy Co., Ltd. reported revenue of RMB 7.173 billion (\$985 million) for the 1 st half of 2023, a 37% decline year-over-year. Its net income of RMB 1.017 billion (\$139.6 million) was down 35% from the same period a year ago.

The company launched its 1 st HJT module in 2019 with an output of up to 355 W. In 2022, it expanded the portfolio with its 700 W Hyper-ion HJT panel. Since then, the manufacturer has cut down wafer thickness from 150 μm to 100 μm which reduces the use of raw materials and improves reliability, according to Ye.

Luxembourg Funding Solar PV & Onshore Wind Projects In Finland & Estonia With EUR52.4 Million Voluntary Payment . The European Commission has officially announced the 2nd cross-border tender for renewable energy, inviting proposals for ground-mounted solar PV projects, and ... TaiyangNews - All About Solar Power. taiyangnews .

Small scale solar PV deployments is steadily increasing in Estonia as per Elering data, and now with the technology participating in the first small-scale renewable auction in the Eastern European country, things should be looking up for solar PV.

The TaiyangNews Solar Power Plant Developments 2024 Conference brought together representatives from leading global players in the module, inverters and solar tracking space on the product supply side and buyers to discuss the latest advancements in utility-scale PV power plants. The participants also touched upon the various challenges for ...

Estonia has seen a significant increase in its solar power capacity in 2022, becoming one of the leaders in solar power per capita among EU members. With growing investments and innovative startups, it now aims to be fully green-powered by 2030.

Trinasolar to present on Day 3 at TaiyangNews Annual Flagship Conference. Lukas Ye, Product Manager at Trinasolar, will be addressing the topic Usher in TOPCon 2.0 Era with i-TOPCon Ultra-Based n-Type Modules on Day 3 of the TaiyangNews Annual Flagship High-Efficiency Solar Technologies 2024 Virtual Conference.. The event will have PV ...
