Ex84 exagrid Yemen

Does ExaGrid require rehydration?

ExaGrid refers to this capability as the "Landing Zone." Local restores,instant VM recoveries,audit copies and even tape copies do not require rehydration. Deduplication and replication are performed in parallel with backup jobs from the Landing Zone to the backend storage of the system. Only deduplicated data is replicated.

Can ExaGrid appliances be deployed in the backup application software?

and with ExaGrid there are no agents to deploy or manage.When comparing ExaGrid appliances deduplication in the backup application software,it is important to keep in mind that using deduplication in the backup application software typically requires greater resources on the backup
