

Germany is keen on expanding cooperation with Tajikistan in the energy sector, including hydroelectric power and other green energy sources, as well as in mining, environmental protection, and ...

The JV now plans to build ground-mounted and floating solar, onshore wind and hydropower projects. The projects will be built under a public-private partnership model, with a 500MW capacity target for the first phase.

It is clear that wind turbines and solar panels are not of much interest to Tajikistan. But the republic hopes that the cooperation between Dushanbe and Berlin on hydropower issues will continue: Germany has already contributed to the construction of the „Tajikistan“ and „Sebzor“ power plants in GBAO, as well as the modernization of the ...

Launched by the German Energy Agency (dena) as part of the „Export Initiative Renewable Energies“ of the Federal Ministry of Economy and Energy sponsored pilot project was as part of the „dena Solar Roofs Program for Foreign Market Development“ from the German Energy Agency successfully realized.

MW Energy, a joint venture between renewables developer Masdar and W Solar Investment, has signed an agreement with Tajikistan's Ministry of Energy and Water Resources (MOEWR) to develop at ...

Launched by the German Energy Agency (dena) as part of the „Export Initiative Renewable Energies“ of the Federal Ministry of Economy and Energy sponsored pilot project was as part of the „dena Solar Roofs Program for Foreign Market ...

MW Energy has signed a memorandum of understanding with Tajikistan's Ministry of Energy and Water Resources to develop 500MW of renewable power projects in the country, which will include ground...

Masdar to develop 500MW of clean energy projects in Tajikistan UAE company, through its MW Energy joint venture, makes its first foray into the Central Asian nation and is looking at solar PV, wind and hydroelectric power developments

The five Central Asian countries - Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan - face significant environmental challenges, including severe pollution and the growing impacts of climate change.
