

How often should a FG Wilson generator be serviced?

A more efficient generator will use less fuel, so will save you more money. For FG Wilson generator sets service intervals are typically every 500 hours for minor services and major services are at every 1000 hours. But there are routine checks that you should carry out to keep your generator running at its best when you need it. Remember!

What should a generator maintenance service look like?

During your inspection, a generator maintenance service will look at: Whether your engine oil needs changing. Replace the air filter and fuel filter components if necessary. Check the fuel system and address contamination or other issues. The alternator to check it works properly and clean it if required.

How to maintain a generator?

Checking for leaks is a straightforward generator maintenance task you want to do before every use. A quick look at where you stored the generator can sometimes prevent a lot of trouble. 3. Check generator fuel stores. Checking your generator fuel stores is an important point on the checklist since you need these to produce electricity.

What should a generator maintenance checklist include?

Annual generator maintenance checklist. Annual maintenance checklists are vital, but they're best left to the professionals who have knowledge of the complex components and how to test them safely. During your inspection, a generator maintenance service will look at: Whether your engine oil needs changing.

Where can I get assistance with my FG Wilson generator set?

For more technical guidance and additional support with your generator set we recommend contacting your local FG Wilson dealer. Our global dealer network ensures that no matter where you are, you can avail of expert support from highly skilled service engineers. Need further support?
