

Who is G-Tek solar project?

G-teK Solar Projects. Company profile G-teK was founded on 1999 by PhD Eng. Giovanni Marino with past experience in the field of electronics. First photovoltaics and solar-thermal systems were developed. Then other renewable energy systems were introduced.

What is a G-Tek system?

G-teK designs and provides power systems based on renewable sources of energy, particularly solar energy, but also wind, hydro and biomasses. The application fields of G-teK systems range from the generation of electric current by means of PV solar modules, optionally integrated in buildings to the production of hot water for civil use.

Why should you choose gtek solar?

Gtek Solar is committed to ensuring a sustainable energy future. Let us help you to turn your rooftop to a renewable source of energy. The solar PV system will reduce CO2 emissions and it's safe with low maintenance. Our high quality systems are easy to operate and monitor. Ensuring the optimum energy solution.

What are the application fields of G-Tek Systems?

The application fields of G-teK systems range from the generation of electric current by means of PV solar modules, optionally integrated in buildings to the production of hot water for civil use. Other sources like wind, water or wood may be used in order to produce clean energy and save costs.

With one of the most advanced production lines in Saudi Arabia, Gtek Solar strives to provide one of the best solutions for sustainable solar electrical power. Gtek Solar specializes in Solar PV EPC projects and the manufacturing of ...

G-teK designs and provides power systems based on renewable sources of energy, particularly solar energy and photovoltaic plants. The application fields of G-teK systems range from the generation of electric current by means of PV solar modules, optionally integrated in buildings to the production of heat for civil, industrial and agricultural use.

G-teK designs and provides power systems based on renewable sources of energy, particularly solar energy, but also wind, hydro and biomasses. The application fields of G-teK systems range from the generation of electric current by means of PV solar modules, optionally integrated in buildings to the production of hot water for civil use.

First photovoltaics and solar-thermal systems were developed. Then other renewable energy systems were introduced. For each technical field covered by the Group, G-teK can provide the right solution, thanks to

relationship with some of the most important brands in the market.

G-teK designs and provides power systems based on renewable sources of energy, particularly solar energy and photovoltaic plants. The application fields of G-teK systems range from the generation of electric current by means of PV ...

G-teK designs and provides power systems based on renewable sources of energy, particularly solar energy, but also wind, hydro and biomasses. The application fields of G-teK systems range from the generation of electric current by means of PV ...

When building a solar power system, the project plays a fundamental role. Several conditions must be met, before the system can work properly. Also, the selection of good and affordable products is very important, in order to reduce the operating and maintenance costs, as well as the total cost of ownership.

Gtek is the manufacturer of the state-of-the-art mono/multi-crystalline solar photovoltaic (PV) modules which supply sustainable solar electric power to both on-grid and off-grid residential, commercial as well as industrial establishments. We have aims to come up as one of the largest manufacturers in Saudi Arabia as well as spread our reach ...
