Solar energy is freely and abundantly available, virtually anywhere on earth, but especially in Africa. Solar power shields homeowners and businesses from power blackouts and future electricity price hikes. The carbon footprint of solar power generators is much lower than that of coal or gas-fired power plants (about 10 to 20 times).

Solar energy offers a sustainable, renewable, and abundant power source for the island of Guam. Solar power is mainstream, and with a Federal Tax Credit of 30%, the time is now to invest in a solar system that will lower your power bills, increase the value of your home, and reduce greenhouse gas emissions.
