

The World Bank Group works in every major area of development. We provide a wide array of financial products and technical assistance, and we help countries share and apply innovative knowledge and solutions to the challenges they face.

The Guinea-Bissau Solar Energy Scale-up and Access Project will work on the development of solar energy generation and network enhancement, including the preparation and implementation for utility-scale solar parks and upgrade and expansion of solar grid infrastructure.

According to Anne-Lucie Lefebvre, the World Bank's resident representative in Guinea-Bissau, the country has significant untapped solar resources, which could be the most cost-effective and rapid solution to bridge the electricity supply gap.

Guinea-Bissau wants to integrate solar energy into its electricity mix. As part of its Solar Energy and Access to Electricity Development Project, the government of this West African country will receive support from the World Bank Group until 2030.

Rural Areas of Guinea Bissau are set to receive electricity through off-grid solar technologies through a project called the Regional Off-Grid Electricity Access Project (ROGEAP). ROGEAP will be implemented by the ...

Guinea Bissau is on the way to become a hub for testing and demonstration of grid-connected and mini-grid solar PV systems. With support of various partners, the country is currently developing and operating the biggest systems of ECOWAS.

Rural Areas of Guinea Bissau are set to receive electricity through off-grid solar technologies through a project called the Regional Off-Grid Electricity Access Project (ROGEAP). ROGEAP will be implemented by the Economic Community of West African States (ECOWAS) and funded by the World Bank.

The Guinea-Bissau Solar Energy Scale-up and Access Project will work on the development of solar energy generation and network enhancement, including the preparation and implementation for utility-scale ...

Learn about the World Bank's \$35 million grant to Guinea-Bissau for a solar energy project aimed at enhancing electricity access and sustainability through solar power generation and infrastructure development.

Guinea Bissau is on the way to become a hub for testing and demonstration of grid-connected and mini-grid solar PV systems. With support of various partners, the country is currently ...

Guinea-Bissau high tech solar group

Guinea-Bissau wants to integrate solar energy into its electricity mix. As part of its Solar Energy and Access to Electricity Development Project, the government of this West African country will receive support from the ...
