

Heliogold solar Jersey

Large cities and counties must comply by September 30, 2023, while smaller ones have until September 30, 2024. Even smaller areas can adopt the software and apply for grants, making solar installation more accessible. California aims to reduce costs and encourage renewable energy adoption through these changes.

In 2022, the United States saw a historic surge in small-scale solar capacity, adding 6.4 gigawatts (GW). California takes the lead with 36% of the country's small-scale solar capacity, driven by sunshine, incentives, and high retail electricity prices. California's Net Energy Metering Program and solar panel requirements for new construction have further boosted adoption. This
