We work with long-term solutions in mind, so we're integrating renewable energy sources and batteries into power generation portfolios. We hope to enable a net-zero emission future and maximize the efficiency of green generation assets like solar, wind, hydro and thermal.

Our mission is to empower energy companies to continuously optimize all aspects of energy production, trading, transportation, and consumption. Our team doesn't just build and support software to get the job done; they push themselves to solve our clients' toughest problems to help them succeed. Why work at PCI?

PCI's integrated energy management platform consolidates all multi-commodity trading activities in a single system, providing full transparency and optimization across power, fuels, and more. Our modular, cloud first solutions are tailored to each customer's needs, anchored by expert support that evolves with your business
