For customers seeking alternative delivery models to a traditional site build, Honeywell offers modular carbon capture solutions. With scale ranging from demo (10 KMTA) to commercial (200 KMTA), Honeywell can offer a modular carbon capture unit to simplify and accelerate installation. Benefits: Lower risk through controlled fabrication off site

Ken West is President and CEO of Honeywell Energy & Sustainability Solutions (ESS). As a global technology leader, ESS enables the energy evolution, provides solutions that reduce emissions, and delivers innovative sustainable materials to our customers across industries. Ken has held several roles with increasing responsibility within Honeywell.

The collaboration between Honeywell and ESS Inc. is more than a technical alliance; it is a collaboration that supports the global transition to a low-carbon, sustainable energy future. By advancing IFB technology and integrating it with state-of-the-art controls, this collaboration drives innovation in the energy storage space,

Honeywell and ESS are collaborating on advancing development of iron flow battery (IFB) energy storage systems based on ESS' patented IFB design with Honeywell's advanced materials and energy systems expertise.

Honeywell ESS To Acquire Air Products' Liquefied Natural Gas Process Technology And Equipment Business To Expand Energy Transition Solutions And Services. Show more. Get in touch. Sign up to receive exclusive communications about offerings, events, news, surveys, special offers and related topics via telephone, email and other forms of ...

The Carbon Capture Technology Expo, alongside the Hydrogen Technology Conference, is a two-day event focused on hydrogen and carbon capture, utilization, and storage (CCUS) technologies. The main objective of the event is to discuss the role of H2 and CCUS solutions in achieving a net-zero carbon economy. Experts will present the latest advancements in CCUS technology ...
