

# How is Trina Solar Panel ranked

Do Trina Solar panels have a positive power rating?

The positive power rating for Trina solar panels is listed at 0~+5, meaning that the panels will not produce less than their power rating but they might produce as much as 5W more than their highest rated wattage. The most important thing to know is that they will not operate at less than the wattage they are rated for under STC.

Is Trina Solar a good company?

Over the last few decades, Trina's strong focus on research and development has led to some great achievements, including 18 solar PV world records in cell and panel efficiency. Trina Solar is ranked one of the top Tier 1 solar panel manufacturers by Bloomberg New Energy Finance.

How much power does a Trina Solar panel produce?

In the case of these solar panels, it is between 310W and 380W. The positive power rating for Trina solar panels is listed at 0~+5, meaning that the panels will not produce less than their power rating but they might produce as much as 5W more than their highest rated wattage.

What is the difference between Trina Solar panels and other brands?

Trina solar panels are mostly compared with other panel companies like Jinko, Longi, Canadian solar panels. In above image you will see comparison between all these solar brands on difference parameters like power rating, max efficiency, cell technology, product warranty, performance warranty, degradation rate. Trina Solaris.

Is Trina Solar better than SunPower?

Overall, Trina Solar offers above-average solar panels at a below-average price. While they may not be as efficient as SunPower, they're not too far behind. Looking at the table above, Trina Solar's Vertex S+ panel is 1.2% less efficient but about 20% cheaper per watt than its SunPower counterpart.

Which Trina Solar panels are the most efficient?

The latest module in the Trina lineup is the Vertex S+ series, which is by far the most advanced and efficient panel produced by the company. The panels feature a maximum power rating of 450W and a maximum efficiency of 22.5%, which is on par with some of the most efficient solar panels available.

Trina was rated 2nd in the global module shipment ranking for 2021 by PV Tech. Last year, Trina's total module capacity was 50GW, where 210mm silicon modules accounted for more than 70%. Simply put, Trina ...
