

# How to clean the glass on the photovoltaic panel surface

How do you clean solar panels?

The best way to clean solar panels is to use a soft-bristled brush or squeegee specifically designed for solar panels, along with a mild soap or specialized cleaning solution. Avoid abrasive materials, excessive pressure, and cleaning during the hottest part of the day. Rinse thoroughly and dry the panels to prevent water spots.

Can you use glass cleaner on solar panels?

Yes, you can use glass cleaners on solar panels but not too much glass cleaner for safety and environmental reasons, and especially if you have a lot of panels, that might take you some time to clean. Most importantly when using glass cleaners is to remove the residue of soap and chemicals with towels, paper, and water.

Do solar PV panels need to be cleaned?

That said, most solar pv panels in the UK will not need any heavy-duty cleaning because regular rain will wash most dirt and grime off the surface, dispelling one of the myths about solar being its difficulty to clean.

Can a cleaning brush be used on solar panels?

It can be used on both solar thermal panels as well as solar PV and is a non-caustic formula. This cleaning brush is specially designed to clean solar panels with a 7.5 metre telescopic rod and rotating circular brushes with a direct water feed.

Can you use vinegar to clean solar panels?

Vinegar is a great cleaning agent for solar panels because it contains acetic acid, which is very capable of breaking down tough stains, dirt and grease. It is also readily available and any vinegar will do although the best type to use is white cleaning vinegar.

How do you clean solar panels on a roof?

Cleaning solar panels on a roof requires extra precautions for safety. Use a sturdy ladder or roof anchor system, and wear non-slip shoes. Start by rinsing the panels with a garden hose, then gently scrub with a soft brush and mild soap solution. Rinse thoroughly and dry with a squeegee or cloth. 3. What is the best way to clean solar panels?

The general advice is to clean early morning or late evening when the panels are cool to avoid cracking the glass from sudden temperature changes. Most of the time, a good rinse with a garden hose is enough to clean the panels.

If you are still unsure if your panels need cleaning and/or how often they should be cleaned, simply follow our solar panel cleaning guide and monitor the changes in the power output of your solar panels before and after.
