

# How to dismantle the vertical photovoltaic panels

How do you dismantle a solar panel?

Disconnect Electrical Components and Turn Off System Switch off the solar electric system at the main utility panel. Then, individually unplug all electrical connectors on panels, disconnect the inverter and batteries, and label all wires clearly. With safety checks complete and the roof protected, it's time to dismantle the solar array:

Can I remove solar panels myself?

While it is technically possible to remove solar panels yourself, it is highly recommended to consult with a professional solar installer or technician to ensure the process is done safely & correctly. Solar panels are delicate and expensive components, and improper handling can lead to damage or injury.

How long does it take to remove solar panels?

With 2-3 installers, plan for solar panel removal to take 1-2 full working days including roof repairs. The exact timeframe depends on system size, mount types, and access challenges. Can I remove solar panels myself? While DIY removal is physically possible, it's highly risky unless you have professional training.

How can I store or dispose of solar panels properly?
