How do I create a roof plan for my solar project?

OpenSolar gives you the ability to create a roof plan for your solar projects. The Planes Acotados is an annotated drawing that shows the dimensions of the roof and solar panels for a given project. To create your roof plan, you must first have a complete system design.

How do roof mounted PV solar panels work?

Roof mounted PV Solar Panels are typically supported by racking systems which come in two basic forms. The first is a mechanically fastened system and the second, the more common of the two, is a ballast restrained system. The mechanically fastened system penetrates through the roofing membrane and can be used in pitched roofs and flat roofs.
