

# How to fill the pits in photovoltaic panel installation

How do I install a solar PV system?

The first step in installing a solar PV system is meeting with a qualified solar installer. During this initial consultation, the solar company will: - Assess your energy needs : By reviewing your electricity bills and understanding your consumption patterns, the installer can recommend the right size and capacity of the solar system.

How to install solar panels?

Make space for the solar panel accessories (solar inverter, cables and solar batteries, if desired), for instance in a plant room 4. Plan a day for installation 5. Erect the scaffolding (this can be done by your supplier or by a company you organise) 6. The solar panel mounts will be installed 7. The professionals will install the solar panels 8.

How do solar panels attach to a roof?

Installers fix solar panels to a roof by lifting up some roof tiles and attaching mounting brackets to the rafters, before carefully placing the tiles back where they were. They'll then attach rails to these brackets, before locking solar panels into the rails.

What is a DIY solar panel installation?

DIY installations allow you to customise your solar panel system to match your home's energy needs and roof layout (or perhaps even a balcony). Some professional installations may offer limited options, while a DIY approach allows for optimising panel placement, choosing specific components, and tailoring the system for maximum efficiency.

How does a solar panel installation work?

The installer will have to lift some of the roof tiles to fix the anchors to the rafters in the loft. This will give the solar panel mounts a stable foundation, and will make sure they don't get damaged in stormy weather. Once the roof anchors have been fixed to the property, the installer will attach the solar panel mounting system to them.

Can solar panels be installed on a roof?

“The solar panels will need to be mounted on the roof by installers who understand roofing and will need some scaffold decks to safely get the panels to the roof.
