

How to install the photovoltaic panel layer

How to install solar panels?

Make space for the solar panel accessories (solar inverter, cables and solar batteries, if desired), for instance in a plant room 4. Plan a day for installation 5. Erect the scaffolding (this can be done by your supplier or by a company you organise) 6. The solar panel mounts will be installed 7. The professionals will install the solar panels 8.

How does a solar panel installation work?

The installer will have to lift some of the roof tiles to fix the anchors to the rafters in the loft. This will give the solar panel mounts a stable foundation, and will make sure they don't get damaged in stormy weather. Once the roof anchors have been fixed to the property, the installer will attach the solar panel mounting system to them.

Do solar panels need TLC?

In fact, your roof may be in more need of TLC than the solar panels you want installed on it. So first, a professional surveyor will check your roof and rafters to ensure that a solar panel installation can go ahead safely. The results of the survey may affect the price quoted by your solar panel providers.

How do you install solar panels on a roof?

Start with a solid foundation, which is essential to add solar panels to a roof or a ground platform. For roof installation, lag bolts are attached to the rafters, and a piece of flashing is used on top of the shingles to prevent leaks. The flashing slides under the shingle wherever a lag bolt installation occurs.

Do you need a survey to install a solar panel?

So first, a professional surveyor will check your roof and rafters to ensure that a solar panel installation can go ahead safely. The results of the survey may affect the price quoted by your solar panel providers. With that done, the installation can begin.

Can solar panels be installed vertically or horizontally?

The panels themselves can be installed vertically or horizontally. Once the mounting system is set up, it's time for the moment we've all been waiting for: getting the solar panels onto the roof. Your installer will start by placing the solar panels onto the mounting system, without fully securing them just yet.
