

# How wide is Trina's monocrystalline photovoltaic panel

How much power does a Trina Solar panel produce?

The TallMax 5BB,385-410W - TSM-DE15H (II) can achieve up to 410W with a 20.2% efficiency, and the TallMax 345-385W - TSM-DE14H (II) can attain a 385W output with a 19.9% efficiency. The high efficiency and power output of Trina Solar panels means that homes don't need many panels on the roof.

What is Trina Solar?

Based on the aim of improving the system efficiency and reducing the balance-of-system costs, Trina Solar's research and development team has introduced an innovative design of low-voltage and higher module string power output. Typically, Trina can interconnect 33 Vertex modules into a string.

Are Trina Solar panels a good choice for residential installations?

Trina Solar panels are a good choice for residential installations as they offer high production levels and reliability. The 360W panel boasts a 19.5% efficiency, which is achieved through the usage of half-cut cell design and Multi Busbar technology.

Why should you choose Trina Solar?

With local presence around the globe, Trina Solar is able to provide exceptional service to each customer in each market and deliver our innovative, reliable products with the backing of Trina as a strong, bankable brand. Trina Solar now distributes its PV products to over 100 countries all over the world.

How many vertex modules can Trina interconnect?

Typically, Trina can interconnect 33 Vertex modules into a string. Compared with other reference module, a single module string can achieve up to a 41% power increase, 15% racking decrease, 17% foundation decrease and 35% combiner box decrease, indicating an innovative technological breakthrough and ushering in a new era of 600W+.

What certifications does Trina Solar have?

Trina Solar's Backsheet Performance Warranty IEC61215/IEC61730/IEC61701/IEC62716 ISO 9001: Quality Management System ISO 14001: Environmental Management System ISO14064: Greenhouse Gases Emissions Verification ISO45001: Occupational Health and Safety Management System

For instance, a single 200W monocrystalline solar panel is able to power a laptop, two hours of TV, one hour of microwave usage, and a light bulb for around 12 hours. While the ...
