What is the IEA's Energy Roadmap?

The International Energy Agency (IEA) is leading the development of a series of roadmap for some of the most important energy technologies. Roadmaps achieve consensus on low-carbon energy milestones, priorities for technology development, policy and regulatory frameworks, investment needs and public engagement.

Should the South Georgia & South Sandwich Islands have a no-take marine area?

Scientists and governments are calling for large no-take marine areas, free from industrial exploitation. The South Georgia and South Sandwich Islands Marine Protected Area is undergoing its second five-yearly review. Recovery of baleen whales coupled with climate change, means managers must be alert to alternative future ecosystem states.

Does Georgia have a strategy for energy supply disruptions?

The Law on the State of Emergency (2005) defines and regulates emergency response, but Georgia has no declared strategy for emergency stockholding or fuel switching mechanisms for energy supply disruptions. The government estimates that Georgia's minimum strategic reserve for gas should be 120 mcm and is considering various storage options.
