

5 ???· Grangemouth co-owner Ineos and Harbour Energy have reached a final investment decision (FID) on the Greensand Future carbon storage project in the Danish North Sea.

The lead partner in Project Greensand, INEOS, has already applied for approval on behalf of licence partners Wintershall Dea (now Harbour Energy) and Nordsøfonden for Denmark's first large-scale CO2 storage facility, and is now working hard to start CO2 storage in the North Sea by the end of 2025 or the beginning of 2026.

INEOS and their partner Wintershall Dea head the consortium of 23 organisations. The project, aims to safely capture and permanently store up to 8 million tonnes of carbon dioxide each year, 40% of Denmark's total emission reduction target.

December 6 2022, The Danish Energy Agency granted Project Greensand permission to store CO2 in the Danish subsoil as part of the pilot-phase. February 6 2023 INEOS and Wintershall Dea received the first full ...
